

eWiSACWIS Enhancement List

Functional Area	Enhancement Description
Adoption Referral	On the Adoption Referral page, in the Birth Parent and Background Tabs, we have modified the dropdown fields to allow multiple selections.
Adoption Search	If the applicant is somebody other than Adoptee, the current name is pre-filling into the Name (at time of order). The system has been modified to no longer pre-fill the name.
Adoption Search	The birth mother, birth father, adoptive mother and adoptive father from the central birth registry will be brought over to the Associated People tab on the ARSP page when the item is searched and retrieved (only for the initial creation - any changes made after the link would not be automatically refreshed).
Adoption Search	On the ARSP Link page, a field has been added after Applicant on the Search Records tab that displays the Person Type (named 'Relationship' field). The 'Relationship to Person' field on the Search Assignment/Resolution page pre-fills into the new 'Relationship' field.
Adoption Search	The Adoption State drop-down field has been moved from the Address Group box to the Adoption Information Group Box on the Adoption Person/Central Birth Registry page.
Adoption Search	The inquiry checkbox from the Adoption Person/Central Birth Registry has been removed.
Adoption Search	The Person Type Drop down has been removed from the Person Group Box, as all persons searched for this ARSP Link page will always be an adoptee.
Adoption Search	The Adoption Search Label Print page has been removed.
Assessment	The Cover Letter with no approval required as requested will be moved to the Forms page and made available via the Create>Case Work>Safety Services. In addition, the Safety Service Staffing Results template – which will have approval processing (as requested) will be moved to the Forms page and made available via the Create>Case Work>Safety Services. These documents do not need to be tied to the assessment and therefore the worker will be able to create this independent of the assessment. They will be made available on the outliner under the Safety Services icon.
Assessment	The anchors for the IA-PC have been removed from the help file and are now available via expandos on the applicable tabs on the IA-PC page.
Case Maintenance	The 'Effective Date' on the Address tab of the Case Maintenance page will pre-fill as the 'Entry Date' on the Address tab of the Person Management page when a Case Address is updated for the case participants.
Case Progress Evaluation	There will be two ticklers associated with a Case Progress Evaluation instead of just one for the following scenarios: A CPE must be completed: a) every 90 days for CPS cases with/without an out-of-home placement, where services are being provided to change conditions that result in threats to safety or risk of maltreatment to children; and, b) every 180 days for CPS cases with in-home services.
Desktop	On the Desktop of the web application the current design includes a section referred to as the General Information Area - this section contains eWiSACWIS Messages & Links and County Messages & Links. This section allows the State/Helpdesk and counties to customize and maintain their own information on the screen by using links.
Desktop	Only Open cases are now displayed when the Date Restricted view is checked.
Desktop	After doing a person search, under the Basic Person Icon, the SSN is now labeled to identify it as an SSN.
Desktop	Placements that are pending approval, approved, not approved, or ended are now distinguishable from the outliner.
Desktop	Supervisors can drill down to view cases and pieces of work assigned to their workers in view only mode.
Desktop	The client server system removed the payment request row from the payments request icon on the desktop once a check has been issued. In eWiSACWIS, the details associated with each payment line of the check will continue to not be displayed on the desktop under the payments icon after the check has been cut but will now be available by drilling down the second level check icon under the Checks Icon on the Desktop. The Check information row will be a hyperlink to the Check Disposition Page and the Payment Line will be a hyperlink to the payment Request page.

eWiSACWIS Enhancement List

Functional Area	Enhancement Description
Intakes	We have standardized the intake process for all intake types.
IV-E Eligibility	The system will now remove the eligibility ticklers when an end date is manually inserted into the eligibility record.
IV-E Eligibility	The “Refer to FAST Ofc Mgr” value has been reworded to “Refer for Eligibility”. The referral functionality is the same.
IV-E Eligibility	There was an edit in the Effective Date field on the Initial Determination and Redeterminations tabs that prevented the user from entering a date that was prior to the placement begin date. The edit has been modified to prevent the user from entering an effective date that is prior to the child’s removal from home date. The home removal date is entered on the Out of Home Placement page.
Legal	We have modified the system to allow users to open one legal document at a time from the Legal Document Page.
Legal	We have added the date beside the court number in the court number drop down on the Legal Document page to help differentiate between multiple actions.
Legal	The roles on the Legal Document page will not be frozen until approval occurs.
Medicaid Eligibility	The Last Prev. MA ID field on the Medicaid Certification page will be disabled for Initial(1) , Amended(3) and Cancel(4) certifications.
Medicaid Eligibility	The cancel date is now entered without edits against the Certification To Date on the certification record.
Medicaid Eligibility	The Medicaid Certification launch point will be a hyperlink on the page so the user will be allowed to view this page (with proper security). Previously, this page was not accessible from a search.
Medicaid Eligibility	On the Medicaid Certification page, the Date of Death field will be required if the reason for cancellation selected is “Death of child”.
Medical/Mental Health	The first name of provider is now displayed on the Medical History tab of the Medical / Mental Health page and the Maintain Medical History page.
Medical/Mental Health	A remove hyperlink has been added next to the Provider Name field and will allow the user to remove an eWiSACWIS provider.
Meetings	The system now supports meetings for all time slots.
Meetings	The system now permits workers to cancel or reschedule meetings that they initially created in search mode.
Notes	The names of the case participant selected at the time the note is created from Create>Case Work will populate the name field in the Assessment Contact Information Group Box. Additionally, the contact date will pre-fill and be editable from the date recorded of the actual assessment contact note.
Notes	Assessment Contact notes can’t be created without an existing Assessment.
Notes	All Assessment Contact notes are now linked to the corresponding Assessment based on the Begin Date of the Assessment that is selected.
Notes	Case notes on the outliner now display the following information if applicable: Category, Type, Date Contact Occurred, Worker, Participant.
Placements	When creating an in-home service with a service type having a child specific rate, the Child Specific Rate field is now required.
Placements	On the provider tab of the Out of Home Placement page, the entire provider name is now displayed instead of just the last name.
Placements	In the client server system, there is no way to generate the “Referral to Out-Of-Home-Care Child’s Characteristics/Needs” notification without a previous placement in the system. In eWiSACWIS this template can be generated from Create>Casework.
Plans	Copy over functionality has been incorporated into the Out of Home Safety Plan.
Providers	A Home Inquiry Screen Out icon has been added to the person search results so when a person search is conducted the user can drill down to the person icon to see the screen out reason for a given Home Inquiry (view only).
Providers	Unlicensed and licensed services have been separated on the Home Provider Services tab. Only active unlicensed and licensed services will be visible on the Services tab. Capacity and statuses for licensed services cannot be modified on the Home Provider Services tab. These modifications will occur on the Home Provider License Services tab.

eWiSACWIS Enhancement List

Functional Area	Enhancement Description
Providers	In client server, the user cannot add capacity information for new non-designated counties on an active license. In eWiSACWIS, the user can add capacities for non-designated counties without relicensing.
Providers	In eWiSACWIS, only active licensed services will be visible on the Home Provider License Services tab.
Safety Assessment	Safety assessments that are automatically created as part of the Assessment process will no longer require a separate approval. Approving the associated assessment will automatically approve the Safety assessment. Safety Assessment created independently (via Create>Case Work) will still have standard approval processing.
Safety Assessment	The Safety Assessment questions are now located directly on the tabs of the Assessment page using expandos. The user has the capacity to answer questions at the same time as completing the assessment without the current Safety Assessment questions pages popping up.
Safety Assessment	The Family-Managed safety plan message currently displayed instructs the user to take action on the current page. The Safety and Analysis and Plan message instructs the user to create a Safety and Analysis Plan (different page in the client server application). The message text has been changed to make it more informative.
Templates	We now have the ability to highlight/copy text from templates that are approved and frozen using the copy from bookmark functionality.
Templates	The system no longer requires that you exit out of Word before launching a template in eWiSACWIS.
Templates	Spell check has been added to templates as well as user entered fields on pages within the application.
Worker Management	The employee number field is no longer required.
